KDP Enterprises, Inc., a small company based in Midland Park, has been providing packaging and janitorial supplies to local businesses and hospitals for more than 10 years. This year, however, KDP began distributing a line of green cleaning products called Earth Friendly Products, which have become the focus of its business. These products are organic, made from plants, 100 percent biodegradable, pH-neutral and dye-, ammonia- and chlorine-free.

"There are other companies that sell Earth Friendly Products, but we are able to keep our retail prices down due to the fact that we are a small, privately owned company," said Kathy Marrazzo, KDP's director of marketing. "We offer full cases, single purchases and exclusive packs, which may be purchased on our Web site www.BuySuppliesNow.com.

"In the fall, we will be offering these exclusive packs to local schools to sell for their fundraising efforts. We already have two schools committed."

The available Earth Friendly Products include an all-purpose cleaner, a dishwashing liquid, a furniture polish, an air and fabric refresher, a window cleaner, a laundry detergent, a dishwasher detergent, a stain and odor remover, a hand soap, a stainless steel cleanser and several pet products. The exclusive packs include the Kitchen Starter Kit ($15.75), the Pet Pak ($22.75) and the Eco Pak ($29.95).

For more information, visit the company Web site or call Kathy Marrazzo at 201-447-9445.
